1.What are the different methods to call a function in R?

You can call it by name, partial name or by Function (specific arguments of position). Thus, there are three ways to call a function in R

2. The lazy evaluation of a function means, the argument is evaluated only if it is evaluated only

if it is used inside the body of the function. Say True or False

The lazy evaluation of a function means; the argument is evaluated only if it is evaluated

only if it is used inside the body of the function. - FALSE

3. State True or False:

a. Insights driven from descriptive analytics is not meaningful. - FALSE

b. The number of values in each Elements of a list, should be equal. - FALSE

c. The datasets are not stored in memory of the computer using R.- FALSE

d. Data frames and matrices are two dimensional however the array is multidimensional. - TRUE
